ICT Week

computer

We had an ICT based week during which we introduced the new E-Safety rules in the school. Pupils made some information leaflets about the importance of keeping themselves safe when using the internet and gaming devices.

Throughout the week pupils used electrical devices in their cooking to make smoothies and beans on toast amongst many other dishes.

Pupils also worked on creating stories and using animation in various formats. Some pupils created their own story boards and then filmed themselves using Green Screen Filming techniques; others used 2Animate to draw their own animations or insert images to create stories.

In art work pupils across the school took photographs of themselves and others in black and white; printed them and created their own "pop art".

Pupils used the BeeBots and Learn Pads too for their learning as well as using algorithms.

It was a great week thinking about how much we use ICT and computing in our lives and how we can help keep safe online.
